LPG... the smarter
fuel alternative.

Convert your car to LPG and you could
save hundreds of dollars a year

The Cleaner
Alternative.

Drive n Save was established to fill the demand for 4 valve solution LPG tanks for the Australian automotive LPG industry.

Drive n Save LPG Automotive Cylinders

Drive n Save automotive LPG cylinders are made for the Australian market and are produced by one of the world's largest LPG cylinder manufacturers. Strictly adhering to Australian and New Zealand standards 3509-1425 and to world quality standard ISO 9002:

Drive n Save LPG automotive cylinders are tested extensively throughout the manufacturing process by SGS the worlds leading testing and certification company and by our own independent consultant Donald S Robinson & Associates who has 38 years experience in the industry. This is to ensure and maintain the highest safety standard and the highest quality finish.

Drive n Save Valves

Drive n Save valves are manufactured to the highest quality, using the latest in technology and machinery. Our manufacturer is a company that use a mass spectrometer to verify the quality of metal used during manufacturing of the valves and adhering to World Standards ISO 9001:2000, ISO 14001:2004, OHSAS 18001. Valves are tested during the manufacturing process to ensure the highest quality. A proven track record of valve manufacturing whose valves are used not only in Australia but throughout the world.

**3 years Warranty
on all Drive n Save
tanks and valves.**
